

FinOps Battle: Anodot vs. Yotascale

Get a complete FinOps solution

Yotascale has been around since 2015, but its incomplete solution has yet to catch on with FinOps professionals. It includes data ingestion, tag management, cost allocation, anomaly detection, and forecasting capabilities. However, it offers only two optimization recommendations, with additional suggestions from cloud providers' native engines.

Anodot stands out as a next-generation certified FinOps platform, offering a unique and augmented approach. It provides comprehensive coverage for all FinOps domains, empowering organizations to rapidly advance their FinOps practices and deliver the highest business value.

Why FinOps pros choose Anodot

✔ Anodot is designed for FinOps success

Anodot stands out as the sole certified FinOps platform **designed specifically to measure and drive success** in cloud financial management across all three major public cloud providers. It empowers you with complete visibility into KPIs and baselines, flexible cost allocation, advanced reporting capabilities, and savings recommendations. These features are instrumental in helping you control cloud waste and enhance cloud unit economics, instilling a sense of confidence in your cloud management strategy.

✔ Extensive library of recommendations

With nearly **80+ types of actionable** savings recommendations, Anodot leads the industry with its comprehensive library of usage and rate optimizations across AWS, GCP, and Azure. This allows you to continuously optimize your cloud infrastructure, prioritize based on impact, and track your savings history.

✔ Market-leading AI & machine learning

Benefit from Anodot's market-leading AI and machine learning capabilities. Its adaptive forecasting and anomaly detection, powered by patented ML-based algorithms, help you avoid costly mistakes. With just two months of historical data, Anodot can produce a **one-year forecast with 95% accuracy**, enabling you to optimize commitment purchases and negotiate long-term discounts. Automated real-time anomaly detection ensures timely action, keeping your cloud investments on track. And with CostGPT, our generative AI FinOps assistant, you get instant insights into your cloud costs.

✔ Advanced features for MSPs

MSPs trust Anodot as their strategic FinOps partner. Drive strategic procurement and pricing decisions, transforming your MSP's cloud unit economics. Simplify and automate internal operations with advanced cost allocation, reporting, billing rules, custom charge types, credit management, and SP/RI reallocation.

The FinOps Platform Trusted by Cloud Leaders
